Construction and Demolition Debris Waste Management Plan

COMPLETE THIS FORM AND SUBMIT TO THE CITY OF HALF MOON BAY BUILDING DEPARTMENT PRIOR TO THE FINAL INSPECTION.

Management of construction and demolition debris (C&D) waste is very important to Half Moon Bay's recycling program. The California Integrated Waste Management Board (CIWMB) has imposed stringent recycling requirements on every city in California, which include the mandate that every city and county 65% of its waste in the year 2000 and beyond, or face stiff penalties for not doing so. Half Moon Bay encourages the proper management of waste collected at construction sites, and thanks you for your cooperation in helping our city meet the recycling requirements.

Under City Ordinance 14.50, all persons taking out a building permit valued at more than \$5,000 are required to complete a plan for managing the waste material at the construction site. We strongly encourage contractors to take advantage of the opportunities to recycle C&D waste and reduce their cost of disposal.

Project Information:

Site Address: _____ Building Permit #: _____
Owner's Name: _____ Owner's Phone #: _____
Type of Project: _____
Scope of Work: _____
Completion Date: _____ Date Submitted: _____

Contractor's Information:

Contractor's Name: _____
Address: _____
Phone #: _____ Lic #: _____

For Office Use Only:

% of Materials Recycled:	_____
% of Materials Disposed:	_____
Award Recommended:	Yes No

Instructions:

The following are common examples of how construction waste is recycled:

- 1 Salvage materials and reuse them.
- 2 Crush concrete and asphalt for reuse.
- 3 Separate materials and take them to recyclers.
- 4 Separate materials and have them picked up by recyclers.
- 5 Haul mixed recyclables to a mixed debris recycling facility.
- 6 Other (Describe): _____

On the chart below, indicate (by number) which of the methods listed above will be used, the types of materials, and the estimated amounts that will be recycled and disposed.

Recycling:

Materials	#	Recycling Facility/Location (City, State)	Total Weight	Est. Amt Recycled		Total Disposed
				Tons	Cubic Yds	
Example: Asphalt	2	ABC Recyclers, Half Moon Bay, CA	120	80		40
Asphalt						
Concrete						
Soil (Clean)						
Wood						
Green						
Scrap Metal						
Salvage Items,						
Petroleum Contaminated						
Drywall						
Asphalt Shingles						
Tile Roofing						
Wood Roofing						
Other, Describe						
Total:						

Recycling Facilities

A **MIXED C&D** facility specializes in sorting recyclable construction material. Mixed C&D loads can include all the materials listed below and the majority of it will be recycled. Large quantities of inert solids (asphalt, concrete, dirt) should be kept separate from mixed C&D loads.

Unless you are taking your recycling to a mixed C&D facility, the following materials must be separated and brought in as clean loads of only one material. Separating recyclables allows you to take advantage of lower fees. Some facilities accept **MIXED INERTS** (mixed loads of crushed asphalt, concrete, dirt) for recycling. Mixed inert loads will cost more than separated loads.

	Mixed C&D	Mixed Inerts	Asphalt	Bricks	Carpet	Cardboard	Concrete	Dirt	Drywall	Metal	Pallets	Porcelain	Rock	Roofing	Wood - Untreated	Yard trimming
