Half Moon Bay, CA 94019

**RE: Phase I Environmental Site Assessment Report
555 Kelly Avenue, Half Moon Bay, California, 94019
Project Number: 2091-001.00**

Dear Mr. Chidester,

ACC has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM practice E1527-13 and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 555 Kelly Avenue, Half Moon Bay, California (Subject Property). This Phase I ESA was requested by the City of Half Moon Bay (Client). This purpose of this Phase I ESA was to assess the Subject Property for Recognized Environmental Conditions as defined by ASTM standard E 1527-13.

This Phase I ESA has not identified evidence of Recognized Environmental Conditions, as discussed in the Executive Summary and the report narrative.

Thank you for choosing ACC to perform this Phase I ESA. If you have any questions regarding this report please contact (510)-638-8400 x 118 or kbunting@accenv.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'KB', is written over a horizontal line.

Kimberly Bunting
Staff Geologist

Phase I Environmental Site Assessment

October 18, 2017

Subject Property:

555 Kelly Avenue
Half Moon Bay, California 94019

Prepared For:

Mr. Matthew Chidester
City of Half Moon Bay
501 Main Street

EXECUTIVE SUMMARY

ACC has performed a Phase I ESA in general conformance with the scope and limitations of ASTM practice E1527-13 and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 555 Kelly Avenue in Half Moon Bay, California (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4.

The earliest record reviewed during this assessment was a 1902 historical topographic map depicting the Subject Property as developed with a non-descript structure.

By 1943, the Subject Property was developed with the current one-story residential dwelling (555 Kelly Avenue).

Historical Subject Property occupants include private residences (1977 to 2013).

This assessment has not revealed evidence of Recognized Environmental Conditions (RECs) at the Subject Property.

This assessment has revealed evidence of Historical Recognized Environmental Conditions (HRECs) at the Subject Property:

HREC: One 600-gallon heating oil UST was located in the backyard of the Subject Property.

According to the *Tank Closure Report* prepared for the Subject Property by Golden Gate Tank Removal and dated 29 July 2004, the tank was found to be in poor condition with at least one visible hole. There was no visual evidence of contamination in the soil underlying the tank. Groundwater was not encountered during the tank removal or sampling activities.

A soil sample was taken from the center of the location of the former tank at approximately 16 feet below the surface grade. One four-point composite soil samples was collected from the soil stockpile containing the overburden soil. The samples were analyzed for total petroleum hydrocarbons (TPH) as diesel (TPH-d), benzene, toluene, ethylbenzene, xylenes (BTEX), and MTBE. The results were non-detect for all constituents in both soil samples. No further action was requested by Golden Gate Tank Removal. An unauthorized release form was submitted to San Mateo County Environmental Health but a case was never opened, likely based on the soil analytical results (non-detect) and the absence of observable contamination.

BER: Based on the historical site use of the surrounding area as agricultural from at least 1943 to 1978, there is a potential that chlorinated pesticides were historically utilized at the Subject Property. At this time there is no available documentation confirming the use of pesticides; locations of former pesticide mixing areas; or that pesticides were applied in a manner not consistent with manufacturer's instructions.

ACC recommends sampling for the presence of pesticides and metals typically associated with historical agricultural practices. The purpose of the sampling is to assess appropriate handling protocol for disturbed soils, and to assess the potential for human health risks associated with residual concentrations of chlorinated pesticides and/or metals typically associated with historical agricultural practices.

Non-Scope Considerations: Based on the age of the buildings, ACC recommends an asbestos-containing building materials (ACBM) survey and a lead-based paint (LBP) survey if building materials are to be demolished or disturbed.

Common ACBMs include flooring and associated adhesive; baseboard and baseboard adhesive; carpet adhesive; leveling compound; drywall, joint and/or texturing compounds; ceiling tiles; roofing felts; roof patching compounds; and mechanical/boiler system insulation. Federal regulations require that potential ACBMs be sampled and analyzed for the presence of asbestos prior to any renovation or demolition activities that disturb such materials (40 CFR Part 61).

The Subject Property buildings may have been constructed prior to 1978 and should be assumed to contain lead-based paint (LBP) based on current regulations. A lead-based paint survey performed by a state-certified Lead Inspector is recommended if painted surfaces are to be disturbed

1.0 INTRODUCTION

On behalf of City of Half Moon Bay (Client), ACC Environmental Consultants, Inc. (ACC) performed a Phase I Environmental Site Assessment (ESA) of the property identified as 555 Kelly Avenue in Half Moon Bay, California (Subject Property).

1.1 Purpose

This purpose of this Phase I ESA was to assess the Subject Property for recognized environmental conditions (RECs), which are defined by ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

1.2 Scope of Services

ACC conducted the following:

- A search of regulatory records and files for the Subject Property, neighboring properties, and nearby sites of environmental concern to assess whether any adverse environmental conditions have impacted, or has the potential to impact the Subject Property.
- A review of historical sources including historical aerial photographs, historical topographic maps, historic city directories and historical fire insurance maps.
- A review of physical setting sources including the USGS 7.5 minute topographic maps, as well as geology, hydrogeology, and soil maps of the Subject Site and vicinity, as deemed appropriate.
- A review of the current title report for the Subject Property (if provided by the Client), and copies of all previous environmental site investigations performed at the property (if applicable and available).
- A site reconnaissance to visually assess the potential for RECs in connection with the Subject Property.
- Interviews of regulatory agencies and available persons familiar with the Subject Property.

1.3 Limitations

A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce uncertainty regarding the potential for RECs in connection with the Subject Property within reasonable limitations of time and cost. There is a point at which the cost of information obtained or the time frame required to

gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions.

Conducting a Phase I ESA alone does not provide a landowner with CERCLA liability protection. Landowners who want to qualify as bona fide prospective purchasers or contiguous property owner must comply with all of the statutory requirements identified in CERCLA Section 107(r) and 107(q). Continuing obligations must be satisfied to maintain liability protection under CERCLA for innocent landowners, bona fide prospective purchasers, and contiguous property owners. Continuing obligations start on the date that a landowner acquires title to a property. The landowner must: 1) comply with land use restrictions and institutional controls; 2) take “reasonable” steps with respect to hazardous substances releases; 3) provide full cooperation, assistance and access to persons that are authorized to conduct response actions or natural resource restoration; 4) comply with information requests and administrative subpoenas; and 5) provide all legally required notices.

The site reconnaissance was limited to a visual observation of the Subject Property. ACC shall not be responsible for areas covered by parked vehicles, overgrown vegetation, and/or other obstacles (heavy furniture, trash bins, miscellaneous stored items, etc.) preventing access or visual observation at the time of the site reconnaissance. Per ASTM Standard Practice E1527-13 it is not necessary to look under floors, above ceilings or behind walls.

As is the case with any investigation of limited scope, site conditions may vary from those observed and witnessed on the date of the site reconnaissance. The possibility of the discovery of the presence of hazardous substances that are not anticipated and/or were neither witnessed nor identified on the date of the site reconnaissance cannot be completely eliminated. ACC cannot offer any form of warranty and/or guarantee that the Subject Property does not contain hazardous substances and/or conditions per the results of performing this Phase I ESA. Because regulatory criteria change over time, potential concentrations of contaminants presently considered not significant may in the future fall under more stringent regulatory standards that require remediation.

Based on ASTM standard E 2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the minimum search distance for potential vapor intrusion by a release of petroleum products is 528 feet (1/10 mile) and the minimum search distance for potential vapor intrusion by other chemicals is 1,760 feet (1/3 mile).

1.4 Project-Specific Limitations and/or Deviations

This assessment did not include any testing or sampling of materials, including soil, water, soil vapor, air or building materials. ACC did not evaluate the purchase price for the Subject Property.

1.5 Significant Assumptions

No significant assumptions were made during this Phase I ESA.

1.6 User Reliance

Reliance upon this report by any parties other than the Client is unauthorized unless expressed written consent is obtained from the Client and ACC.

2.0 SITE DESCRIPTION

The Subject Property is located along the northern side of Kelly Avenue between Cabrillo Highway South and Church Street in Half Moon Bay, California (APN: 056-150-200). The Subject Property is accessible from Kelly Avenue to the south.

The Subject Property consists of an approximately 6,206–square foot parcel of land developed with a one-story residential dwelling and associated detached garage.

Utilities including electricity and gas are provided by Pacific Gas & Electric. Water and sewer service is provided by Coastside County Water District (CCWD).

3.0 USER PROVIDED INFORMATION

ACC contacted the client via a user questionnaire with regard to environmental liens, activity and use limitations, specialized knowledge of environmental conditions, and commonly known or reasonably ascertainable information. A completed user questionnaire was not returned to ACC. A copy of the user questionnaire is included in Appendix A.

3.1 Title Report

A Title Report was not provided to ACC.

3.2 Environmental Liens or Activity and Use Limitations (AULs)

The User provided no information with regard to environmental liens or AULs in connection with the Subject Property.

3.3 Specialized Knowledge

ACC was not aware of any specialized knowledge regarding the Subject Property.

3.4 Commonly Known or Reasonably Ascertainable Information

Any commonly known or reasonably ascertainable information available to ACC has been incorporated into this report.

3.5 Valuation Reduction for Environmental Issues

ACC did not evaluate the purchase price for the Subject Property.

3.6 Owner, Property Manager, and Occupant Information

The current owner of the Subject Property is City of Half Moon Bay.

3.7 Previous Environmental Reports

No previous environmental reports were provided to ACC.

4.0 RECORDS REVIEW

ACC contracted Environmental Data Resources, Inc. (EDR) to research available environmental records and historical data for the Subject Property based on ASTM Standard Practice E1527-13. A complete list of searched records and databases, as well as search distances, is attached as Appendix B. The search distances provided by EDR are in accordance with ASTM Standard Practice E1527-13 and AAI guidelines.

The database search by EDR revealed 23 mapped sites within a one-eighth mile radius of the Subject Property. The Subject Property and nearby properties of potential concern are discussed below.

4.1 Summary of EDR Records for Subject Property

Site Name: Schauer, George

Site Address: 555 Kelly Avenue, Half Moon Bay

Discussion: This site is listed on the San Mateo County Bl. And HAZNET databases as having an underground storage tank. This site is listed as generating other empty containers 30-gallons or more in at least 2004.

4.2 Adjacent and Nearby Properties of Potential Concern

Site Name: Pacific Bell

Site Address: 565 Kelly Avenue, Half Moon Bay

Gradient Direction: Up/Cross Gradient

Discussion: This site is listed on the RCRA NonGen/NLR, FINDS, and ECHO databases and located nearby to the east. No violations were found. No currently available information indicates that this site has impacted the Subject Property.

Site Name: SMC Sheriff Half Moon Bay Sub Station
Site Address: 535 Kelly Avenue, Half Moon Bay
Gradient Direction: Up/Cross Gradient

Discussion: This site is listed on the San Mateo Co Bl database and located nearby to the north. The site is listed as storing hazardous materials. No currently available information indicates that this site has impacted the Subject Property.

Site Name: Cunha Intermediate School District
Site Address: Kelly Avenue & Church Avenue, Half Moon Bay
Gradient Direction: Up/Cross Gradient

Discussion: This site is listed on the SWEEPS UST and LUST databases and located nearby to the east. The site is listed as having a 5000-gallon diesel UST. According to Geotracker, soil was impacted with diesel. No other site history is available. The issue was closed on 16 October 2001. No currently available information indicates that this site has impacted the Subject Property.

Site Name: Pacific Bell
Site Address: 525 Kelly Avenue, Half Moon Bay
Gradient Direction: Down/Cross Gradient

Discussion: This site is listed on the FINDS, ECHO, SWEEPS UST, HIST UST, RCRA-SQG, and EMI databases and located nearby to the west. This site is listed as having a 1000-gallon diesel underground storage tank (UST) and an air emission permit from at least 2006 to 2014. No currently available information indicates that this site has impacted the Subject Property.

Site Name: AT&T California - PC083
Site Address: 525 Kelly Avenue, Half Moon Bay
Gradient Direction: Down/Cross Gradient

Discussion: This site is listed on the San Mateo Co Bl and UST databases and located nearby to the west. This site is listed as storing and generating hazardous materials and having an active UST. No currently available information indicates that this site has impacted the Subject Property.

Site Name: Food & Liquor #44
Site Address: 501 Kelly Avenue, Half Moon Bay
Gradient Direction: Down/Cross Gradient

Discussion: This site is listed on the HIST UST, SWEEPS UST, San Mateo Co Bl, HIST CORTESE, and LUST databases and located nearby to the west. The site is listed as having two 10000-gallon gasoline USTs and one 10000-gallon waste UST installed in 1968. The USTs were replaced with three 12000-gallon gasoline USTs and one 500-gallon waste oil UST in 1994.

According to the *Workplan for Destruction of Groundwater Monitoring Wells at Former Food & Liquor #44*, prepared by ATC Associates Inc. and dated 25 August 2009 (ATC 2009), during the removal of two USTs in 1986, petroleum hydrocarbons were present in soil beneath the USTs. Groundwater monitoring occurred between 1987 and 2009. The closest groundwater monitoring well to the Subject Property (MW-2) was non-detect for constituents of concern during the final sampling events of 2002 to 2009. The issue was case closed as of January 11, 2009. No currently available information indicates that this site has impacted the Subject Property.

Site Name: DMC Green Inc.

Site Address: 501 Kelly Avenue, Half Moon Bay

Gradient Direction: Down/Cross Gradient

Discussion: This site is listed on the San Mateo Co BI database and located nearby to the west. The site is listed as storing and generating hazardous waste and having an inactive UST. No currently available information indicates that this site has impacted the Subject Property.

Site Name: More for Less

Site Address: 501 Kelly Avenue, Half Moon Bay

Gradient Direction: Down/Cross Gradient

Discussion: This site is listed on the UST databases and located nearby to the west. No additional information was provided for this site. No currently available information indicates that this site has impacted the Subject Property.

4.3 California Division of Oil & Gas Records

Based on the department of Conservation, Division of Oil, Gas & Geothermal Resources online database, the Subject Property is not situated within 0.25 miles of an active oil, gas and/or geothermal well(s).

4.4 Additional Environmental Record Sources

In addition, ACC submitted file review request letters, emails and/or phone calls to the following agencies for the Subject Property:

4.4.1. California EPA – Department of Toxic Substance Control (DTSC)

ACC received a response from the DTSC on September 25, 2017. No files were available for the subject property.

4.4.2. Regional Water Quality Control Board (RWQCB)

ACC contacted the RWQCB on September 26, 2017. No files were available for the subject property.

4.4.3. San Mateo County Department of Environmental Health (SMCDEH)

ACC reviewed files from the SMCDEH on September 25, 2017.

Files from the SMCDEH included permits to remove an approximately 600-gallon underground storage tank (UST) of home heating oil in July 2004.

According to the *Tank Closure Report* prepared for the Subject Property by Golden Gate Tank Removal and dated 29 July 2004, one UST was located in the backyard of the property and was believed to be approximately 60 to 80 years old. The owner at the time had no knowledge of the tank.

During excavation activities, the tank was found to be in poor condition with at least one visible hole. There was no visual evidence of contamination in the soil underlying the tank. Groundwater was not noted during the tank removal or sampling activities.

A soil sample was taken from the center of the location of the former tank at approximately 16 feet below the surface grade. One four-point composite soil samples was collected from the soil stockpile containing the overburden soil. The samples were analyzed for total petroleum hydrocarbons (TPH) as diesel (TPH-d), benzene, toluene, ethylbenzene, xylenes (BTEX), and MTBE. The results were non-detect for all constituents in both soil samples. No further action was requested by Golden Gate Tank Removal.

4.4.4. Bay Area Air Quality Management District (BAAQMD)

ACC received a response from the BAAQMD on September 27, 2017. No files were available for the subject property.

4.4.5. Coastside Fire Protection District (CFPD)

ACC received a response from CFPD on September 22, 2017. No files were available for the subject property.

4.4.6. Half Moon Bay Building Division (HMBBD)

ACC reviewed files from the HMBBD on September 27, 2017.

Files from HMBBD included a re-roof permit for a residence in 1993.

A permit to upgrade electrical service was issued in 2004.

A permit to remove a home heating oil underground storage tank was issued in 2004.

4.5 Historical Use Information on the Property

Information pertaining to historical uses of the Subject Property and adjoining properties was obtained from the following sources: aerial photographs, historical topographic maps, historical Sanborn Maps and city directories. These resources were obtained from Environmental Data

Resources (EDR).

ACC reviewed historical aerial photographs dated 1943, 1948, 1956, 1963, 1968, 1974, 1982, 1991, 1998, 2005, 2006, 2009, 2010, and 2012. A copy of the Historical Aerial Photographs is provided in Appendix C.

ACC reviewed historical topographic maps dated 1902, 1940, 1948, 1952, 1961, 1968, 1973, 1978, 1994, 1997, and 2012. A copy of the Historical Topographic Maps is provided in Appendix D.

Historical Sanborn Maps (fire insurance maps) are detailed scaled drawings that show the location and use of building structures that have occupied a given area from as early as the late 1800s. These maps can provide information that is unavailable from other sources regarding the development and use of a given property. ACC reviewed historical Sanborn maps dated 1905, 1911, and 1932. Historical Sanborn Maps are provided in Appendix E.

Historical city directories were provided by Haines Company, Inc. and Cole Information Services Directories were reviewed for available data from the years 1970 to 2013. The Subject Property address reviewed included 555 Kelly Avenue. A copy of the Historical City Directories is provided in Appendix F.

4.5.1 Historical Use Information on the Subject Property and Adjacent Properties

Pertinent observations from the historical resources in relation to the Subject Property and the immediately adjacent properties is as follows:

Subject Property

Circa 1902 to 1940 According to historical references reviewed, the Subject Property appears developed with a non-descript structure.

Circa 1943 to 2013 According to historical references reviewed, the Subject Property is developed with the current residential dwelling with associated detached garage (555 Kelly Avenue). Occupants during this time include private residences (1977 to 2013).

535 Kelly Avenue, Adjacent Property to the North

Circa 1902 to 1940 According to historical references reviewed, the area to the north of the Subject Property is undeveloped.

Circa 1943 to 1974 According to historical references reviewed, the area to the north of the Subject Property appears developed as agricultural.

Circa 1977 to 1985 According to historical references reviewed, the area to the north of the Subject Property is undeveloped.

Circa 1991 to 2012 According to historical references reviewed, the area to the north of the Subject Property is developed with the current commercial building. Occupants during this time include Child Care Council (1992), Coastside Opportunity Center (1992 to 1995), Child Care Coordinating Inc (1995), Paul Richardson (1995), Half Moon Bay Sports Club Inc (1999), Mariners Community Church (2003) and Senior Coastsiders (1992 to 2013).

600 Church Street, Adjacent Property to the South

Circa 1902 to 1940 According to historical references reviewed, the area to the south of the Subject Property is developed with Kelly Avenue followed by non-descript structures.

Circa 1943 to 2012 According to historical references reviewed, the area to the south of the Subject Property is developed with Kelly Avenue followed by the current high school building. Occupants during this time include Cunha Intermediate Middle School (2012).

565 Kelly Avenue, Adjacent Property to the East

Circa 1902 to 1943 According to historical references reviewed, the area to the east of the Subject Property is undeveloped.

Circa 1948 to 2013 According to historical references reviewed, the area to the east of the Subject property is developed with the current commercial building (565 Kelly Avenue). Occupants during this time include Bell Building (1992 to 1995).

525 Kelly Avenue, Adjacent Property to the West

Circa 1902 to 1940 According to historical references reviewed, the area to the west of the Subject Property is undeveloped.

Circa 1943 to 1968 According to historical references reviewed, the area to the west of the Subject Property appears developed as agricultural.

Circa 1974 to 1978 According to historical references reviewed, the area to the west of the Subject Property appears developed with a structure along the southeastern portion.

Circa 1982 to 2012 According to historical references reviewed, the area to the west of the Subject Property is developed with the current commercial building.

4.6 Historical Summary for Subject Property

The earliest record reviewed during this assessment was a 1902 historical topographic map depicting the Subject Property as developed with a non-descript structure.

By 1943, the Subject Property was developed with the current one-story residential dwelling with associated detached garage building (555 Kelly Avenue).

Historical Subject Property occupants include private residences (1977 to 2013).

4.7 Vapor Intrusion

In accordance with ASTM E 2600, ACC assessed the Subject Property for a potential vapor intrusion condition (pVIC). A vapor intrusion condition is defined by ASTM E 2600 as “the presence or likely presence of any chemicals of concern in the indoor air environment of existing or planned structures on a property caused by the release of vapor from contaminated soil or groundwater on the property or within close proximity to the property, at a concentration that presents or may present an unacceptable health risk to occupants.”

There is no documented evidence of subsurface impacts that presents a pVIC at the Subject Property. It is ACC’s opinion that a potential vapor intrusion condition at the Subject Property can be ruled out at this time.

5.0 PHYSICAL SETTINGS

The Subject Property is approximately 60-70 feet above mean sea level according to the U.S. Geological Survey (USGS) Half Moon Bay 7.5 Minute Quadrangle topographic map (1997). The Subject Property is relatively flat.

Based on the boring logs prepared by ATC Associates Inc. for the site located at 501 Kelly Avenue located nearby to the west of the Subject Property and dated 28 December 2004, the subsurface beneath the Subject Property is described as gravelly sand near the surface with increasing amounts of silt and clay with depth.

Groundwater was encountered at approximately 11 to 24 feet bgs due to seasonal variations. The groundwater gradient is calculated to flow to the north-northwest toward Half Moon Bay. Subsurface conditions are anticipated to be similar at the Subject Property but may vary.

6.0 SITE RECONNAISSANCE

On October 16, 2017 ACC representative Ms. Kimberly Bunting conducted a site reconnaissance at the Subject Property. Mr. Brian Lee, representative for City of Half Moon Bay, provided site access.

6.1 Methodology

The Subject Property was viewed from all adjacent public thoroughfares and was observed to the extent not obstructed by bodies of water, adjacent buildings, and/or other obstacles such as overgrown vegetation. Accessible interior and exterior common areas were viewed. Special attention was given to hazardous materials storage/use areas and potential conduits to the subsurface such as drains and sumps.

6.2 General Site Setting

The Subject Property is currently developed with a one-story residential dwelling with basement and associated detached garage building. The buildings are constructed of wood framing with concrete masonry exterior walls. The main entrance to the dwelling is located along the southern portion. Additional entrances are located along the northern and northwestern portions. An exterior staircase located along the western portion of the building provides access to the basement.

Entrances to the detached garage building are located along the southeastern and eastern portions of the building. A roll-up door is located along the southern portion of the garage building. The Subject Property is currently vacant.

6.3 General description of Vicinity, Adjacent Properties and Observed Current/Past Usage

The vicinity of the Subject Property consists of residential and commercial properties. The adjacent properties as viewed during the site reconnaissance are as follows:

- North - Ted Adcock Community Center & Half Moon Bay Recreation (535 Kelly Avenue)
- South - Kelly Avenue followed by Manuel F. Cunha Intermediate School (600 Church Street)
- East - Commercial Building – Pacific Bell (565 Kelly Avenue)
- West - Main Street Services Auto Repair (525 Kelly Avenue)

6.4 Summary of Site Visit Observations

The Subject Property consists of a vacant three-bedroom and two-bathroom residential dwelling. Visual inspections of the Subject Property did not reveal evidence of stains or spills.

A basement is located along the northern portion of the building. Located within the basement are a gas hydronic boiler and hot-water heater. A shower is located within the southeastern portion of the basement. Visual observations of the basement did not reveal evidence of stains or spills.

The detached garage building consists of two vacant storage areas with concrete floors. Visual observations of the garage building did not reveal evidence of stains or spills.

Floor drains are located throughout the basement and associated paved areas of the Subject Property. Visual observations of the drains did not reveal evidence of stains or spills.

Wood planks are located along the eastern portion of the backyard in the approximate location of the former underground storage tank. Visual observations of the concrete pad did not reveal evidence of stains or spills.

No underground or aboveground storage tanks, violations or other indications of storage and/or use of hazardous materials associated with the Subject Property were observed during the site reconnaissance.

7.0 INTERVIEWS

7.1 Interview with Owner/Site Manager or Representative

Interviews with Mr. Matthew Chidester revealed he has been associated with the Subject Property since 2017.

7.2 Interviews with Occupants

The Subject Property is currently vacant and unoccupied.

7.3 Interviews with Local Government Officials

See Section 4.2.

7.4 Interviews with Others

No additional interviews were conducted for the Subject Property.

8.0 FINDINGS & OPINIONS

ACC has performed a Phase I ESA in general conformance with the scope and limitations of ASTM practice E1527-13 and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the

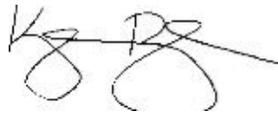

property identified as 555 Kelly Avenue in Half Moon Bay, California (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4. No significant data gaps were identified while conducting this Phase I ESA.

This assessment has not revealed evidence of Recognized Environmental Conditions (RECs) at the Subject Property.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The site reconnaissance and interviews were conducted by Ms. Kimberly Bunting, who was also responsible for obtaining and reviewing historical use documentation, interpreting data, identifying RECs, HRECs, CRECs, BERs, and preparation of this Phase I ESA Report. All of the activities were performed in conjunction with and under the supervision or responsible charge of, Mr. Ian Sutherland, the environmental professional assigned to this project.

I certify that I possess sufficient education, training, and relevant experience necessary to conduct the investigative and interpretive activities presented in the paragraph above in accordance with the ASTM E1527-13 standard and possess the ability to identify issues relevant to RECs in connection with the Subject Property.

APPENDIX A
AAI QUESTIONNAIRE

**PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE**

Please answer the following questions to the extent possible and return via email to **kbunting@accenv.com** (or fax to 510.638.8404). Please provide a copy of the Title Report.

Name:	
Title:	
Phone Number:	
Email Address:	
Signature:	
Date:	
How long have you have been associated with the property:	
Please list all complete current and known historical address(s) and Assessor's Parcel Number(s) for which this Phase I ESA is being performed (feel free to attach maps or other documentation showing property boundaries):	
Please list the acreage of the parcel(s), square footage and age(s) of on-site structures and property zoning:	
Purpose for which Phase I ESA is being performed (if for a real estate transaction, please list type of transaction, sale, purchase, lease, etc.):	
Please list all parties who will rely on the Phase I ESA:	
Please provide the property owner or owner representative, including telephone number and/or email address (the owner will be identified in the Phase I ESA and may be interviewed by ACC as warranted and if available):	

<p>Please provide a site contact, including telephone number and/or email address for purposes of scheduling the site visit:</p>
<p>Please list the current tenant(s), current site use(s) and years of occupancy:</p>
<p>Please list former tenant(s), former site use(s) and years of occupancy:</p>
<p>How do you intend to use the property (if you plan to redevelop please discuss development plans and whether on-site soils will be disturbed/excavated):</p>
<p>Has there been any major renovations, additions or demolition at the property? If so, please provide year and basic information for the events:</p>
<p>Who provides gas, electric, water and sewer services?</p>
<p>Did a search of recorded land titles identify (or are you aware of) any environmental liens filed or recorded against the property under federal, tribal, state or local law? If yes, please explain.</p>
<p>Did a search of recorded land titles identify (or are you aware of) any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? If yes, please explain.</p>

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Does the purchase price being paid for this property (if applicable) reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases, for example:

(a) Do you know the past uses of the property?

(b) Do you know of specific chemicals that are present or once were present at the property?

(c) Do you know of spills or other chemical releases that have taken place at the property?

(d) Do you know of any environmental cleanups that have taken place at the property?

(e) Other?

Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Are you aware of any of the following documents prepared for the property:			
	Yes	No	Date(s)
a. Environmental Site Assessment			
b. Subsurface Soil/Groundwater Investigations			
c. Environmental Permits			
d. Hazardous Materials/Waste Permits			
e. National Pollution Discharge Elimination System (NPDES) Permits			
f. UST/AST Registration Documents/Permits			
g. Underground Injection System Registration Documents/Permits			
h. MSDS Sheets			
i. Community Right to Know Plans			
j. Hazardous Materials Management/Business Plans			
k. Storm Water Pollution Prevention Plans (SWPPP)			
l. Spill Prevention Control & Countermeasure Plans			
m. Activity and/or Use Limitations			
n. Risk Assessments			
o. Geotechnical Studies			

Are you aware of any of the following items associated with the property?		
	Yes	No
a. Asbestos-containing materials or lead-based paint located at the subject property?		
b. Hazardous materials/waste spills related to that have occurred on the subject property?		
c. Litigation associated with the subject property with regards to violations of environmental law?		
e. Are you aware of any Aboveground Storage Tanks (ASTs) or Underground Storage Tanks (USTs) located at the property? If yes, what are the contents and capacities:		
f. Electrical transformers on the subject property?		
g. Are you aware of any chemical/petroleum products being used or stored at the subject property? If yes, are MSDS available? ___ Yes ___ No		
h. Are any of the past or current occupants hazardous waste generators?		
i. Are there any pits, ponds or lagoons for waste treatment or disposal on the subject property?		
j. Are there any wells (irrigation, groundwater or monitoring) at the subject property?		
k. Are there any sumps, floor drains, or catch basins, oil-water separators, or acid neutralization systems on the subject property?		
l. Are there any storm drains on the subject property?		
m. Have there been any significant structural fires at the property?

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there is 1 SLIC site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110066010961

Environmental Interest/Information System
STATE MASTER

Registry ID: 110013290660

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

made in the referenced report. Proposed soil gas borings G1 and G2 are to be located south of the Boiler room and north of the dry cleaning machine, respectively, to a depth of less than five (5) feet bgs (e.g. 4.9 feet bgs), where concentrations of indicator chlorinated solvent constituents, PCE and TCE, were identified in recent subsurface investigations.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: N/A
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 98	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: N/A
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 98	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346
Date Made Active in Reports: 05/05/2017	Last EDR Contact: 07/21/2017
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/30/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 08/11/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 10/09/2017

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 08/11/2017

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Number of Days to Update: 44	Next Scheduled EDR Contact: 10/09/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695
Date Made Active in Reports: 06/09/2017	Last EDR Contact: 08/30/2017
Number of Days to Update: 101	Next Scheduled EDR Contact: 12/11/2017
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

ENF: Enforcement Action Listing

A listing of Water Board Enforcement Actions. Formal is everything except Oral/Verbal Communication, Notice of Violation, Expedited Payment Letter, and Staff Enforcement Letter.

Date of Government Version: 05/01/2017	Source: State Water Resources Control Board
Date Data Arrived at EDR: 05/03/2017	Telephone: 916-445-9379
Date Made Active in Reports: 08/15/2017	Last EDR Contact: 08/18/2017
Number of Days to Update: 104	Next Scheduled EDR Contact: 11/08/2017
	Data Release Frequency: Varies

Financial Assurance 1: Financial Assurance Information Listing

Financial Assurance information

Date of Government Version: 06/05/2017	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/09/2017	Telephone: 916-255-3628
Date Made Active in Reports: 08/15/2017	Last EDR Contact: 07/21/2017
Number of Days to Update: 67	Next Scheduled EDR Contact: 10/30/2017
	Data Release Frequency: Varies

Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 05/16/2017	Source: California Integrated Waste Management Board
Date Data Arrived at EDR: 05/19/2017	Telephone: 916-341-6066
Date Made Active in Reports: 08/15/2017	Last EDR Contact: 08/10/2017
Number of Days to Update: 88	Next Scheduled EDR Contact: 11/27/2017
	Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2015	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 10/12/2016	Telephone: 916-255-1136

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 04/15/2015

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

RESIDENTIAL PROPERTY
555 KELLY AVE
HALF MOON BAY, CA 94019

TARGET PROPERTY COORDINATES

Latitude (North):	37.464178 - 37° 27' 51.04"
Longitude (West):	122.43214 - 122° 25' 55.70"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	550218.6
UTM Y (Meters):	4146314.2
Elevation:	67 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640614 HALF MOON BAY, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

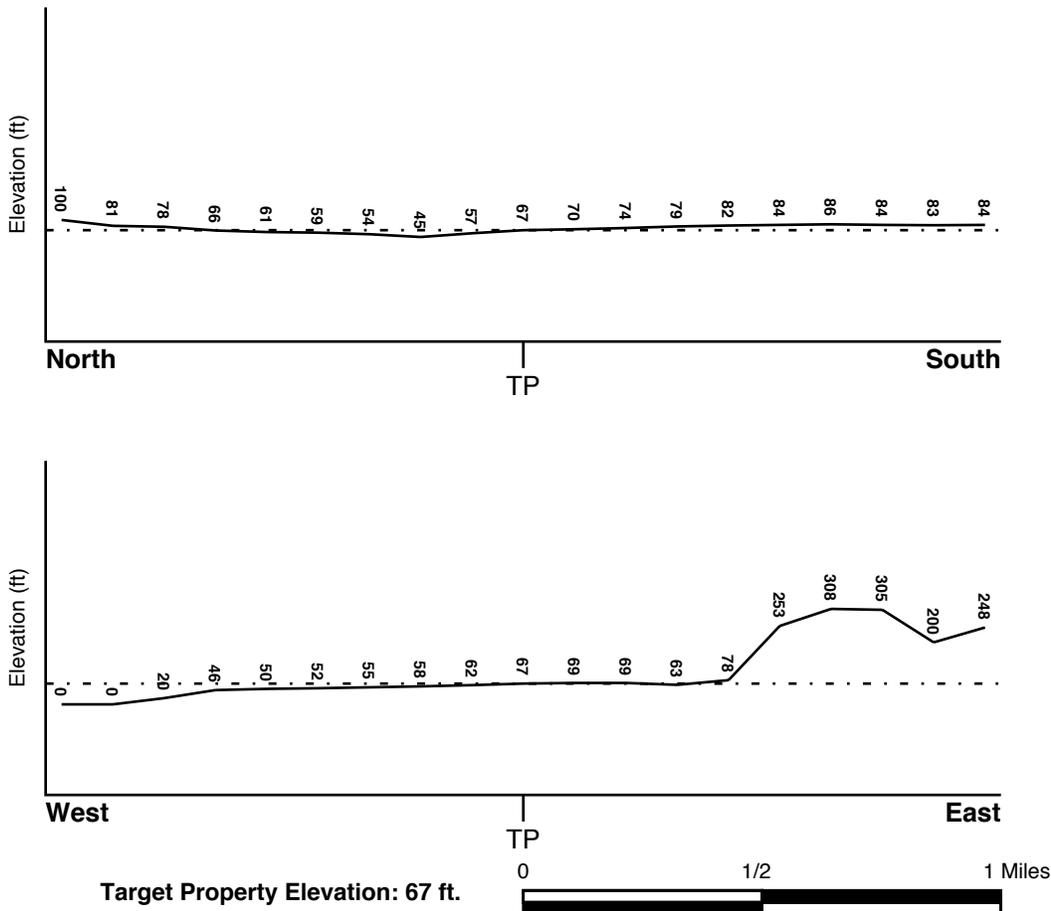

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06081C0260E	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06081C0255E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
HALF MOON BAY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Pliocene
Code: Tp (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: WATSONVILLE

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 5.60
2	18 inches	39 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.06 Min: 0.00	Max: 8.40 Min: 5.60
3	39 inches	63 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.20 Min: 0.06	Max: 7.30 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
gravelly - sandy loam
clay
loamy sand
unweathered bedrock

Surficial Soil Types: sandy loam
gravelly - sandy loam
clay
loamy sand
unweathered bedrock

Shallow Soil Types: clay
gravelly - sandy clay loam
gravelly - coarse sandy loam
silty clay
loamy sand
silt loam

Deeper Soil Types: stratified
loam
weathered bedrock
sandy loam
fine sand
very fine sandy loam
unweathered bedrock

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ACC Environmental Cons. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

"PROCEDURES TO CLOSE UNDERGROUND STORAGE TANK(S) SYSTEMS"

- 1) Submit to the San Mateo County Environmental Health Services Division (Division) a completed "Underground Storage Tank System Closure Permit Application." Prepare State Water Resources Control Board Facility and Tank Pages. These forms are available from the Division or you may download the forms by logging on to www.unidocs.org.
 - Include a complete "Tank Page" for each tank to be closed.
 - Include a complete "Facility Page" (if tank to be closed is agriculture, home heating oil, or non-regulated).
 - Include "Proof of Financial Responsibility"
- 2) Include with the submitted application the designated fee, workmen's compensation insurance verification, and plot plan drawing. The drawing consists of an aerial view of the facility which shows the tank(s) location and the following information:
 - Scale
 - North Arrow
 - Property Line
 - Location of structures near the tank(s)
 - Location of relevant existing equipment (including the tank(s) to be removed), associated piping, and fuel dispensers
 - Area Roadways
- 3) The Division must be notified a minimum of three (3) days prior to commencement of work in order to schedule a removal inspection. The removal inspection appointment **must be confirmed with the district inspector**. A representative of the Division must be present at the time of removal.
- 4) Site safety plan must be available for review at job site.
- 5) Contact the local fire and building agency for their policy regarding closure of underground storage tanks. It is the contractor's responsibility to notify and coordinate the closure with the local fire agency.
- 6) It must be demonstrated to a representative of the Division that residual product and any associated waste (i.e. sludge) have been removed from the interior of the tank(s) prior to purging. Documentation of proper disposal of residual product and associated waste using a Uniform Hazardous Waste Manifest (UHW) must be submitted to the Division within thirty (30) working days following removal of the tank(s).
- 7) It must be demonstrated to a representative of the Division that the tank(s) explosive atmospheres have been adequately purged and that an explosive risk **does not** exist at the time of removal.
10% of Lower Explosive Limit [% LEL] or 5% oxygen.
- 8) Underground tank(s) and associated piping removed from excavations must be shipped under UHW to a permitted treatment, storage and disposal (TSD) facility or Class I landfill. Underground tanks may be cleaned using a high-pressure washer to reduce the % LEL. However, the high-pressure washing process **does not** render the tank(s) **non-hazardous**; and the tank(s) must be transported off-site under a Uniform Hazardous Waste Manifest. Any piping associated with the tank(s) which are to remain underground must be flushed of all residual product and capped or sealed to the satisfaction of the Division. Copies of all UHW must be submitted to the Division within thirty (30) working days following removal of the tank(s).
- 9) To determine the extent of any contamination, soil and/or water samples must be collected from the excavation pit after the tank(s) are removed. Soil samples must also be taken every twenty (20) feet along piping runs at the interface of backfill material and native soil. Soil samples must be collected from the excavation stockpile (approximately one discrete sample per twenty (20) cubic yards). The samples must be collected by a qualified, independent third party. All samples shall be protected against contamination and/or degradation during their collection, transport, and analysis. Submit to the Division, within thirty (30) days following removal of the tank(s), a written sample analysis report, which includes chain of custody documentation, sample location map, and depth to sample measurements. The reports analysis results and conclusions are subject to critical review; and the report must be approved by the Division to be recognized as valid.

10) A groundwater investigation will be required if any of the following conditions exist or if a representative of the Division deems one necessary to assure that the public health and safety is protected:

- Soil contamination concentrations exceeding 100 PPM total petroleum hydrocarbons (TPH) or total oil and grease (TOG) within two feet of native soil beneath the tank.
- Detectable concentrations of petroleum hydrocarbon are found in soil at or below the seasonable high groundwater level.
- Detectable levels of any petroleum hydrocarbon in soil below the tank and the soil contains layers of sand, gravel and/or other high permeability material.
- Groundwater in excavation pit has detectable levels of any petroleum hydrocarbon. (pit may be pumped and allowed to recharge).
- Site has history of leaks or tanks are in poor condition upon removal.

11) Transported tanks must have all openings sealed, except for opening atop the tank fitted for ventilation with "T" or other device which will preclude rain entering a stored tank.

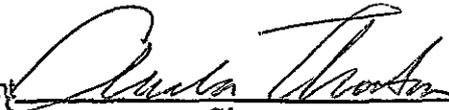

12) An additional hourly fee will be charged for inspection time exceeding four (4) hours.

The listed items are general closure requirements, modifications may be necessary in certain situations. A deficient application or incomplete information will only cause a delay in the permit process, if you have questions or need assistance call the Division at (650) 363- 4305. The Underground Tank Closure Permit expires 90 days from the approval date. If the tanks have not been closed within 90 days, a new closure permit application and fees are required. The closure must be scheduled 72 hours in advance.

Applicant Declaration:

I certify the application information is correct and factual. I declare that I have read and will follow the "Procedures to Close Underground Storage Tank(s) Systems." I further agree to comply with all applicable San Mateo County Ordinances; Health and Safety Code Chapter 6.7; Title 23, California Code of Regulation; and Title 22, California Code of Regulations.

1.0 PURPOSE

This operating procedure establishes minimum procedures for protecting personnel against the hazardous properties during the performance of the removal of an underground storage tank and related activities. All employees and subcontractors of Golden Gate Tank Removal shall follow this plan. This plan is developed to work with the California Occupational Safety and Health Code to quickly prepare and issue a site safety plan for the removal of an underground storage tank and the related activities.

2.0 APPLICABILITY

This procedure is applicable to the removal of underground storage tanks and the related activities. Listed below are some of, but not limited to, the activities and substances that may be encountered during the project.

Activities:

The work to be performed will include: the excavation of potentially contaminated soil in order to expose the underground storage tank, the stock piling of soil, the removal and manifested disposal of the tank, the recovery of soil samples from the excavation and stockpiled soil, and the backfill and resurfacing of the excavation.

Substances:

- Diesel Fuel Oil (Home Heating Oil)
- Lead and Unleaded Gasoline
- Diesel Fuel
- Motor Oil (used and unused)

3.0 RESPONSIBILITY AND AUTHORITY

Personnel responsible for project safety are the business unit's Health and Safety Officer (HSO), the Project Manager (PM), and the Site Safety Officer (SSO).

The HSO is responsible for reviewing and approving the site safety plan and advising both the PM and SSO on health and safety matters. The HSO has the authority to audit compliance with the provisions of the site safety plan, suspend work or modify work practices for safety reasons, and to dismiss from the site any individual whose conduct on-site endangers the health and safety of themselves and/or others.

The PM is responsible for having the site safety plan prepared and distributed to all field personnel and to an authorized representative of each firm contracted to assist with the on-site work.

The SSO is responsible for assisting the PM with on-site implementation of site safety plan. The SSO may suspend work anytime he/she determines that the provisions of the site safety plan are inadequate to ensure worker safety and inform the PM and HSO of individuals whose on-site behavior jeopardizes their health and safety or the health and safety of others.

4.0 HAZARD EVALUATION/CRITERIA

Chemical

The general types of chemical hazards associated with this project are exposure to various chemical substances, including but not limited to, petroleum hydrocarbon liquids and vapors, caustic and acidic mists, liquids and solids. Exposure to elevated levels of hydrocarbon vapors presents potential health risks that need to be properly controlled. Work practices and methods will be monitored to limit exposures. Where elevated exposures persist, respiratory protection will be the primary control method to protect personnel from inhalation of hydrocarbon vapors.

Physical

The general types of physical hazards associated with this project are:

- Mechanical hazards: swinging objects, machinery, etc.,
- Physical lifting, shoveling, climbing (ladder), etc.,
- Electrical hazards: buried cables and overhead power lines,
- Thermal hazards: heat stress, and heat exhaustion
- Acoustical hazards: excessive noise created by machinery.

Flammability

The general types of flammable hazards associated with this project are fire hazards: natural gas and product lines, flammable petroleum hydrocarbons, and motor driven equipment.

Petroleum distillate fuels possess two intrinsic hazardous properties, namely, flammability and toxicity. The flammable property of the oil and fuels presents a far greater hazard to field personnel than toxicity because it is difficult to protect against and can result in catastrophic consequences. Being Flammable, the vapors of volatile components of crude oil and the fuels can be explosive when confined.

Eliminating any one of the three factors needed to produce combustion can minimize the probability of fire and explosion. Two of the factors, ignition source and vapor concentration, can be controlled in many cases. Prohibiting open fires and smoking on-site, installing spark arrestors on engines and turning off engines when lfl is approached can control ignition. Introducing dry ice (solid carbon dioxide) in the tank can reduce vapor concentrations in the headspace; the carbon dioxide gas will displace the combustible vapors.

5.0 HEALTH AND SAFETY DIRECTIVES

Site-Specific Safety Briefing

Before fieldwork begins, all field personnel, including subcontractor employees must be briefed on their work assignments and safety procedures contained in this document.

Personal Protective Equipment

Each field team member shall have on-site, before the commencement of work, the following personal protective equipment:

- NIOSH-approved full or half face respirator with organic vapor cartridges (cartridges will be supplied pending the work criteria).
- Hard-hat and safety vest
- Leather work boots, steel toed boots are strongly suggested
- Leather work gloves
- Ear protection, earphone type or ear plugs
- Eye protection, safety glasses and splash proof goggles

Equipment Usage

Hard-hats and safety vests must be worn at all times when on the job site.

Safety goggles must be worn when working within 10 feet of any operating heavy equipment (e.g., jackhammer, and backhoe). Splash-proof goggles or face shields must be worn whenever product quantities of fuel are encountered.

Respirators must be worn whenever total airborne hydrocarbon levels in the breathing zone of field personnel reach or exceed a 15-minute average of 25 ppm. If total airborne hydrocarbons in the breathing zone exceed 100 ppm, work must be suspended, personnel directed to move a safe distance from the source, and the HSO or designee consulted.

Chemical-resistant safety boots must be worn during the performance of work where surface soil is obviously contaminated.

Monitoring

Personal exposure to ambient airborne hazards will be monitored to assure that personnel exposures do not exceed acceptable limits and that appropriate selection of protective equipment items is made. If concentrations approach criteria levels, all personnel will be notified of possible site safety changes. Audits will be conducted by the Safety Officer to insure compliance with the Safety Plan and to provide additional support as required.

Area Control

Access to hazardous and potential hazardous work sites must be controlled to reduce the probability of occurrence of physical injury and chemical exposure of field personnel, visitors and the public. A hazardous or potential hazardous area includes area where a tank removal or related activity is being performed and/or field personnel are required to wear respirators.

Cordons, barricades, and/or emergency traffic cones or posts, depending on conditions must identify the boundaries of hazardous and potentially hazardous areas. If such areas are left unattended, signs warning of the danger and forbidding entry must be placed around the perimeter if the areas are accessible to the public. Trenches and other large holes must be guarded with wooded or metal barricades spaced no further than 20 feet apart and connected with yellow caution tape. The barricades must be placed no less than two feet from the edge of the excavation or hole.

Entry to hazardous areas shall be limited to individuals who must work in those areas. Unofficial visitors must not be permitted to enter hazardous areas while work in those areas is in progress.

Official visitors should be discouraged from entering hazardous areas, but may be allowed to enter only if they agree to abide by the safety officer and are informed of the potential dangers that could be encountered in the areas.

Decontamination

Field decontamination of personnel and equipment is not required except when contamination is obvious (visual or by odor). Recommended de-contamination procedures follow:

Personnel

Gasoline, heating oil, diesel and oil should be removed from skin using a mild detergent and water. Hot water is more effective than cold. Liquid dishwashing detergent is more effective than hand soap. If weathered to an asphaltic condition, mechanics waterless hand cleaner is recommended for initial cleaning followed by detergent and water.

Equipment

Gloves, respirators, hard-hats, boots and goggles should be cleaned as described under personnel. However, if boots do not become clean after washing with detergent and water, they should be cleaned with a strong solution of trisodium phosphate and hot water. If this fails, clean with diesel oil followed by detergent and water to remove diesel oil.

Sampling equipment, augers, vehicle undercarriages, and tires should be steamed cleaned. The steam cleaner is a convenient source of hot water for personnel and protective equipment cleaning.

6.0 SAFETY AND HEALTH TRAINING

Each individual on the job site should have been or is preparing to attend the 40 hr. Hazardous Materials Handling Course as required by the California Occupational Safety and Health Association. In addition, the HSO conducts BI-weekly health and safety meetings.

Each morning before fieldwork begins, all field personnel, including subcontractor employees, must attend the site-specific safety briefing at their work site to receive assignments and safety procedures.

7.0 RECORD KEEPING REQUIREMENT

The following record keeping requirements will be maintained in the program file indefinitely. The particular organization responsible for these records is also listed.

- Copy of this Health and Safety Plan - Golden Gate Tank Removal.
- Health and Safety Training Certification Form for Site Safety Officer -- Golden Gate Tank Removal.
- Any accident/illness report forms -- All Parties.
- Personal sampling results -- Golden Gate Tank Removal.
- Documentation of employee's medical ability to perform work and wear respirators -- All parties.

8. FINDINGS / RECOMMENDATION	3

ATTACHMENTS

1. SITE LOCATION

The subject residential property is located at 555 Kelly Avenue, between Church Street and HWY 1 in Half Moon Bay, California. Figure 1 attached shows the general site vicinity. The approximate location of the tank as well as nearby streets is shown on the attached Figure 2. Photographs of the tank removal activities are shown on the attached Figure 3.

2. SITE HISTORY

One underground, fuel storage tank was located in the backyard of the property on Kelly Avenue. The tank had a capacity of approximately 600 gallons, measuring about 6 feet long by 4 feet in diameter, and was constructed of steel. The fill port was located on the north end of the tank. The age of the tank is unknown but is believed to be between 60 and 80 years old. The owner had no knowledge of the tank nor is there any indication of previous site investigation activities.

3. TANK REMOVAL

Golden Gate Tank Removal, Inc. (GGTR) applied for and obtained permits from the County of San Mateo County Department of Environmental Health, and OSHA. All site work was performed in accordance with state and local regulations.

On July 19, 2004 GGTR mobilized its equipment and began work on the project. The overburden soil covering the tank was removed and placed in a covered stockpile adjacent to the tank excavation. Measurements indicated the bottom of the tank to be 14 feet below the ground elevation. GGTR placed wooden shoring in the excavation in direct accordance with the attached shoring calculations. The subsurface product piping extending between the top of the tank and the foundation of the exterior building structure was cut at each end, drained of any residual product, and removed from the excavation area. The subsurface piping remaining in place was filled with concrete and capped. As part of the removal operations, GGTR inspected the tank. The tank was found to be dry without any residue of hydrocarbons.

On July 27, 2004, upon the approval of Mr. Robert Keliiaa of the County of San Mateo Department of Environmental Health, GGTR removed the tank from the excavation. After a visual inspection, the tank was then loaded onto a flatbed truck and transported by Clearwater to E.C.I. A copy of the Certificate of Disposal is attached.

4. TANK AND SOIL CONDITION

~~The tank was found to be in poor condition with at least one visible hole. No soil discoloration was observed in the tank overburden soil or in the soil underlying the tank. No hydrocarbon odors were noted in the overburden soil or in the soil underlying the tank. The overburden soil was predominantly clay and sand. The soil underlying the tank was predominantly clay and sand. Because of holes in the tank, an Underground Storage Tank Unauthorized Release (Leak) / Contamination Site Report was required by the County of San Mateo Department of Public Health. A copy of the completed report is attached.~~

5. TANK REMOVAL SAMPLING

Immediately following tank removal activities, under the direction of Mr. Robert Keliiaa, GGTR then collected a soil samples from the center of the location of the former tank. Soil sample 8531-CTR[16'] was collected from the center of the tank excavation at approximately 16 feet below the surface grade. In addition, GGTR collected one four-point composite soil sample from the soil stockpile containing the overburden soil. The composite stockpile sample was labeled 8531-SP.

6. TANK REMOVAL SAMPLE RESULTS

The tank excavation and stockpile composite soil samples were analyzed for Total Petroleum Hydrocarbons (TPH) as Diesel (TPH-D; EPA Method 8015M), Benzene, Toluene, Ethylbenzene and Total Xylenes (BTEX; EPA Methods 5030/8020F), and Methyl Tertiary-Butyl Ether (MTBE; EPA Methods 5030/8020F). Table 1, presented below, summarizes the analytical results for the tank removal samples. "ND" indicates Non-Detectable results. The results are also tabulated on the attached San Francisco Soil/Groundwater Sampling Data Form. A copy of the laboratory certificate of analysis and chain of custody form is attached.

TABLE 1
TANK REMOVAL SAMPLE RESULTS

SAMPLE I.D.	TPH-D (ppm)	Benzene (ppm)	Toluene (ppm)	Ethylbenzene (ppm)	Xylenes (ppm)	MTBE (ppm)
8531- SP (Overburden Stockpile)	ND	ND	ND	ND	ND	ND
8531-CTR {16'} (Center of Excavation)	ND	ND	ND	ND	ND	ND

Note: ppm - parts per million [equivalent to milligrams per kilogram (mg/kg)]

7. SITE RESTORATION

By August 5, 2004, GGTR backfilled the excavation with the stockpiled overburden soil and clean imported soil. The excavation backfill soil was subsequently compacted and the site was restored.

8. FINDINGS / RECOMMENDATION

There were visible holes in the tank. There was no visual evidence of contamination in the soil underlying the tank. Groundwater was not noted during the tank removal or sampling activities. The analytical results from the State Certified Laboratory following the tank removal and remedial activities showed levels of total petroleum hydrocarbons as diesel and BTEX below the Action Level for residential heating oil tanks. Therefore, it is the recommendation of Golden Gate Tank Removal, Inc. that no further action be taken and the site be closed by the County of San Mateo County Department of Public Health.
