

FOR DISTRICT 2 MEMBER OF THE CITY COUNCIL

HARVEY RARBACK

Occupation: Incumbent

I have been proud to be part of a forward-looking City Council which has worked hard to improve the lives of our residents, especially our most vulnerable ones. After the tragic shooting of farmworkers last year revealed the appalling living conditions of many of our farmworkers, I have facilitated building dignified and affordable workforce housing. I helped our homeless population by building the first shelter on the Coastside. We have empowered the Clean Team at Abundant Grace to help keep our beaches and streets clean while giving meaningful work to many people down on their luck—a win-win for them and Half Moon Bay.

I hold a PhD in physics which has enabled me to understand many of the technical issues we face, like our need for more reliable electric and communications infrastructure on the Coastside.

The Sierra Club has endorsed me because of my environmental record including my work to preserve open space. As a Director of Peninsula Clean Energy, I have worked to provide electricity which is greener and cheaper than PG&E's. I am a neighborhood lead for CERT and a former elected Director on the Fire Board.

I respectfully ask for your support. More information is available at [www.HarveyRarback.com](http://www.HarveyRarback.com).

A handwritten signature in black ink that reads "Harvey Rarback". The signature is written in a cursive, flowing style.
